Advanced Security Features Keep Your Property Protected

The ACT 10 Keypad has been engineered for maximum security. Features like door monitoring, fire alarm override, and tamper output ensure that access to your property remains tightly controlled. The keypad works seamlessly with many different access control systems to provide multilayered protection.

Weather-Resistant Construction Built to Last

Encased in durable polycarbonate housing, the ACT 10 withstands use in indoor and outdoor locations. With an IK10 impact rating and an IP55 ingress protection rating, it stands up to tough conditions while maintaining a modern, elegant look. This multi purpose keypad operates in a wide temperature range and continues to provide reliable access control in challenging environments. Please note that the weather shield has been discontinued.

Simple Programming and Operation

Although packed with features, the ACT 10 is designed to be user-friendly for installers, administrators, and end users. It can be used on standalone doors. It has access control door monitoring and interlock applications.

Ideal Uses for the Versatile ACT 10 Keypad

Thanks to its extensive capabilities, the ACT 10 can enhance access control across many different settings: Commercial office buildings, residential apartments, healthcare facilities, educational institutions and retail businesses.
